

# Moose Hunting in Unit 23 by Local Residents

## Kobuk River, Noatak and Selawik Areas: What You Need to Know

Alaska residents have three moose hunts to choose from in Game Management Unit 23, which includes the Northwest Arctic Borough and Point Hope. The table on the back summarizes the three options for the Kobuk, Noatak and Selawik River drainages. Some other parts of Unit 23, including Pt. Hope, have slightly different regulations.

Regulations have recently changed, due to a region-wide decline in moose numbers. Some seasons have been shortened, and cow seasons eliminated.

-The state registration hunt (RM 880) applies to most lands in Unit 23 and provides the best hunting opportunity for most people. To participate in the state registration hunt you must pick up a permit in person in Unit 23 between June 1 and July 15.

-The federal subsistence hunt is only open on federal public lands in Unit 23, and hunters must live in Unit 23. If you didn't register for the RM880 during June-July, you can still hunt in the federal hunt with a state harvest ticket.

-The state general hunt is the most restrictive of the three hunts, with shorter dates and larger antler requirements.

*This is only a brief summary of key regulations. Please familiarize yourself with all regulations, including methods, salvage, etc. Call our office or ADF&G if you have questions.*

### In All Hunts

- To qualify as an Alaska resident, you must have lived in Alaska for the preceding 12 months.
- To qualify as a Unit 23 resident, you must have lived in Alaska for the preceding 12 months and make your permanent home in Unit 23 (no minimum time required).
- Hunters age 18 and older must have a hunting license.
- Reporting the results of your hunt is required.
- Regardless of which hunt you participate in, each hunter may take no more than one moose per year.
